EDUCATION

University of St. Thomas

Saint Paul, MN

Bachelor of Science in Computer Science, **Graduating with Honors**

- Academic Standing: **Dean's List**
- Relevant Coursework: Data Mining & ML, Statistics, Computer Architecture, Human Computer Interaction, Distributed Systems.

TECHNICAL SKILLS

Languages: Go (Golang), Python, JavaScript, TypeScript, Java, Swift (SwiftUI), C, SQL

Cloud & Networking: Cloudflare Workers, Cloudflare Pages, Zero Trust Access, AWS, Docker

Product Tools: Jira, Git/GitHub, Agile/Scrum, User Research, A/B Testing, Data Analytics

Frameworks: React, Node.js, PyTorch, Scikit-Learn, Google ADK

EXPERIENCE

University of St. Thomas

Saint Paul, MN

Computer Science Tutor

Feb 2025 – Present

- Mentor students in core CS concepts including Data Structures, Algorithms, and Software Design.
- Facilitate technical problem-solving sessions, helping peers debug complex logic in Java, Python, and C.

Custom AI Studio

Saint Paul, MN

Technical Product Manager Intern

Dec 2024 – Feb 2025

- Acted as Technical PM for a team of 3 engineering interns, managing the roadmap and delivery of a macOS MVP application.
- Defined product requirements and utilized Agile sprints to deliver the project 100% on schedule.
- Conducted user analysis to identify friction points, implementing a DeepGram API solution that saved users 10 hours of manual work per week.

University of St. Thomas

Saint Paul, MN

Software and Cloud Intern

Oct 2024 – Present

- Standardized UI consistency across university assets, collaborating with stakeholders for 100% design compliance.
- Optimized DevEx by architecting reusable components, reducing feature implementation time by 60%.
- Modernized infrastructure with CI/CD pipelines, reducing production deployment time from 1 hour to 15 mins.

Nexus AI Club

Saint Paul, MN

Founder & President

June 2023 – Present

- Founded the university's first AI organization to address the curriculum gap in LLMs.
- Organized the campus's first 24-hour AI hackathon sponsored by **Anthropic**; managed \$6k in prize distribution and coordinated logistics for 50+ participants.
- Defined product vision for club management, overseeing a TypeScript tool that reduced planning time by 50%.

PROJECTS

Classfinder.ai | React, TypeScript, Cloudflare Workers, Go

- Developed a natural language class search engine currently serving **70+ active users**; integrated Rate My Professors data to streamline the course selection process.
- Conducted A/B testing on RAG vs. Hybrid search algorithms to maximize relevance and UX.

Eureka Campus Buddy | SwiftUI, Firebase, iOS

- Built and launched an iOS application to facilitate campus social life by organizing hangouts and events.
- Successfully onboarded **70+ users** through organic campus growth and user-centric design.

YC Agentic Payments Hackathon Winner | Stripe API, LLMs, TypeScript

- Placed top 10 from a pool of **14k+ applicants** to build autonomous payment solutions in a competition sponsored by **Stripe**.
- Architected an AI agent using x402 protocol that conducted conversational surveys and paid users based on feedback quality

Tommie Compliments | React, Node.js, SQL

- Designed and deployed an anonymous compliment-sharing platform to foster a positive campus culture.

mow-manager.web.app | React, Stripe API, SQL, Twilio

- Engineered a vertical AI agent managing a mowing business generating **\$10k/month** revenue.
- Integrated Stripe APIs for automated billing, reducing administrative overhead by 95%.
