EDUCATION

University of St. Thomas

Bachelor of Science in Computer Science, **Honors**

- Academic Standing: **Dean's List**
- Relevant Coursework: Data Mining & ML, Statistics, Distributed Systems, Computer Architecture, Human Computer Interaction.

Saint Paul, MN

Expected Dec. 2026

TECHNICAL SKILLS

Languages & Data: SQL, Python, Go (Golang), JavaScript, TypeScript, Java, Swift, C

AI & ML: LLMs, RAG, PyTorch, Scikit-Learn, Google ADK, AI-assisted development tooling

Cloud & Infra: Cloudflare Workers, Durable Objects, Cloudflare Pages, Zero Trust Access, AWS, Docker, CI/CD

Product: User Research, A/B Testing, Product Usage Analytics, Agile/Scrum, Jira, Git/GitHub

EXPERIENCE

Cloudflare

Product Manager Intern, Workers Observability

Austin, TX

June 2026 – Aug. 2026

- Owned **local tracing for Workers** from problem to launch — scoped an ambiguous observability gap, prototyped with engineers, and shipped automatic OpenTelemetry tracing in local dev so developers can debug without deploying.
- Set an **agent-first** product direction: an API that lets AI coding agents query traces to find, fix, and verify bugs locally, positioning Workers for AI-assisted development.
- Sourced and conducted **15+ customer research interviews** with enterprise users including **OpenAI** and **Contentful**, turning findings into prioritized roadmap items.
- Led design, build, and launch of a new Durable Objects UI with design and engineering, helping developers pinpoint and triage erroring actors faster.
- Co-authored the [launch blog post](#) and docs, then iterated on shipped features using developer feedback from X.

Custom AI Studio

Technical Product Manager Intern

Saint Paul, MN

Dec 2024 – Feb 2025

- Acted as Technical PM for a team of 3 engineering interns, owning the roadmap and end-to-end delivery of a macOS MVP on schedule.
- Analyzed user friction points to make a data-driven build decision, shipping a DeepGram API solution that saved users 10 hours of manual work per week.

University of St. Thomas

Software and Cloud Intern

Saint Paul, MN

Oct 2024 – Present

- Optimized developer experience by architecting reusable components, reducing feature implementation time by 60%.
- Modernized infrastructure with CI/CD pipelines, cutting production deployment time from 1 hour to 15 minutes.

Nexus AI Club

Founder & President

Saint Paul, MN

June 2023 – Present

- Founded the university's first AI organization to close the curriculum gap in LLMs; grew a community of 50+ members.
- Organized the campus's first 24-hour AI hackathon sponsored by **Anthropic**; managed \$6k in prize distribution and logistics.

Aquinas AI Technical Committee, University of St. Thomas

Committee Member

Saint Paul, MN

- Serve on the university technical committee guiding campus-wide implementation of Aquinas AI.

PROJECTS

Classfinder.ai | React, TypeScript, Cloudflare Workers, Go, SQL

- Built a natural-language class search engine serving **70+ active users**; A/B tested RAG vs. hybrid search on usage data to maximize relevance and UX.

YC Agentic Payments Hackathon Winner | Stripe API, LLMs, TypeScript

- Placed top 10 of **14k+ applicants** (sponsored by **Stripe**); architected an AI agent using the x402 protocol that ran conversational surveys and paid users based on feedback quality.

mow-manager.web.app | React, Stripe API, SQL, Twilio

- Engineered a vertical AI agent for a mowing business generating **\$10k/month**; automated billing via Stripe, cutting administrative overhead by 95%.

Eureka Campus Buddy & Tommie Compliments | SwiftUI, React, Firebase, SQL

- Launched two campus-community apps — an iOS hangout organizer and an anonymous compliment platform — onboarding **70+ organic users**.
